

Board of Directors

Meeting date: April 16, 2025

Agenda Item #: 11

Corridor Planning Program Update

Agenda item type: Informational briefing

Summary

Update on the 2024-2027 Corridor Planning Set Aside program, and an overview of the upcoming call for projects for the 2026-2027 funding.

Background

The Transportation Corridor Planning Set Aside is a Denver Regional Council of Governments (DRCOG)-led planning program in the 2024-2027 Transportation Improvement Program (TIP). The goal of this program is for DRCOG to take a more direct role to advance planning for projects and priorities contained in the 2050 Regional Transportation Plan (2050 RTP) and move them towards implementation. As part of this program, DRCOG is funding and leading planning studies to advance infrastructure investment priorities along regional arterial corridors identified in the 2050 RTP. \$3,000,000 is available for the full four-year set-aside program, with \$1.5 million expected to be allocated each two-year cycle.

The DRCOG Board selected two projects for the Corridor Planning Set Aside for fiscal year 2024 and 2025 funds: the East Colfax Extension Bus Rapid Transit Alternatives Analysis Study (now called Colfax BRT Next), and the Sheridan Corridor Safety Study.

DRCOG is co-managing [Colfax BRT Next](#) with the City of Aurora, and in close partnership with Adams and Arapahoe Counties, the Colorado Department of Transportation, and the Regional Transportation District. The project team selected a consultant team led by Nelson\Nygaard for the study, which officially kicked off in fall 2024. The study has developed a draft existing conditions analysis and is initiating the first phase of community engagement. The project team anticipates the study will wrap up in December 2025 and result in a locally preferred alternative and a funding and implementation framework to advance the project.

DRCOG is leading the [Sheridan Corridor Safety Study](#) in partnership with CDOT, Denver, Lakewood, Wheat Ridge, Edgewater, Mountain View and Lakeside. Through the study, the team seeks to identify infrastructure improvements to reduce serious and fatal crashes along Sheridan, between I-76 and US-285. The project team selected a consultant team led by Consor for the project, which is also currently slated to wrap up in December 2025.

Upcoming Call for Projects

DRCOG is hosting a call for letters of interest this summer to identify projects for the 2026-2027 program funding. An estimated \$1.5 million will be available. Letters of interest must be submitted by a local jurisdiction or regional transportation agency between April 28 and June 13, 2025. Eligible projects must be included in the 2050 RTP, with priority given to projects in early staging periods. Trails and limited access highways are not eligible. This program only covers planning activities on these corridors, it cannot be used for advanced design or construction.

Once selected, all studies funded through the Corridor Planning Set Aside will be led by DRCOG in close collaboration with the nominating agency and other stakeholders. Additional information about the call for projects, including a list of eligible corridors and the Letter of Interest form are available on the DRCOG [Corridor Planning website](#).
