Abstract: The Annual Listing of Obligated Projects lists all federal transportation funding obligated within the Denver region for the period October 1, 2022, through September 30, 2023 (federal fiscal year 2023).

Preparation of this report has been financed in part through grants from the Federal Transit Administration and the Federal Highway Administration of the United States Department of Transportation.

If you have difficulty using this document's content or you need an accommodation, please email access@drcog.org or call 303-455-1000.

Purpose of this Report

The federal [metropolitan transportation planning statute](#) requires metropolitan planning organizations to work cooperatively with their relevant state and public transportation operator to develop a listing of projects for which federal transportation funds were obligated each federal fiscal year.

The Federal Highway Administration defines obligation as the federal government's legal commitment (or promise) to pay or reimburse states or other entities for the federal share of a project's eligible costs. Thus, an obligated project is one that has been approved by the federal government for reimbursement, though not necessarily reimbursed yet. Obligation does not necessarily mean that a project was initiated or completed during this year. The amount of funding obligated each year also may not be the same as the final project cost.

This report lists all federally funded transportation funding in the Denver region that was obligated in federal fiscal year 2023 (October 1, 2022, to September 30, 2023), as required in statute.

Background

Denver Regional Council of Governments

The [Denver Regional Council of Governments](#) is an association of 58 local governments committed to protecting and enhancing the quality of life in the Denver, Colorado metropolitan area. The council serves several functions for the region, including as a federally designated metropolitan planning organization. In this capacity, the council coordinates regional transportation planning to address important regional needs in Broomfield, Denver, Douglas, and Jefferson counties and portions of Adams, Arapahoe, Boulder, and Weld counties.

Transportation Improvement Program

The Transportation Improvement Program is the adopted list of surface transportation projects and studies scheduled to receive federal or state transportation funds over a four-year period. Once a project is listed in the program, project sponsors work with the Colorado Department of Transportation, the Regional Transportation District, or other contracting agencies to initiate their project and receive federal authorization (and obligation of federal funds). Sponsors may then begin work on their project and receive reimbursements of the federal share of costs.

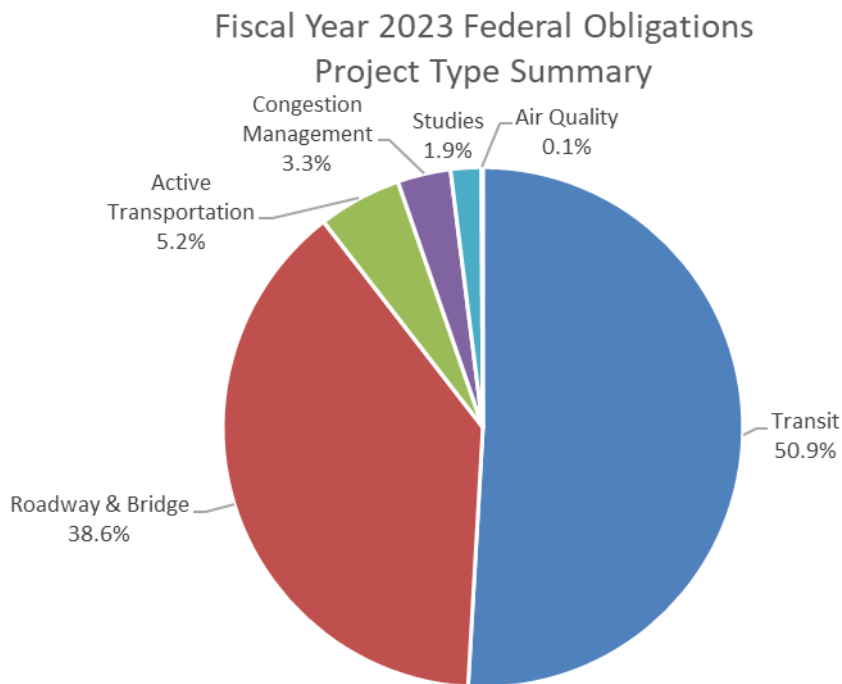

The Transportation Improvement Program covering federal fiscal year 2023 is the Fiscal Year 2022-2025 Transportation Improvement Program and was adopted on April 21, 2021. It has been amended regularly since adoption and has since been superseded by the Fiscal Year 2024-2027 Transportation Improvement Program. Some of the projects in this obligation report are from previous Transportation Improvement Programs.

Summary of Obligated Projects

A net total of \$489.7 million was obligated in federal fiscal year 2023 on 80 transportation projects. Some statistics regarding these obligations include:

- \$249.3 million (50.9%) for transit projects,
- \$189.0 million (38.6%) for roadway and bridge projects,
- \$25.4 million (5.2%) for stand-alone active transportation projects (does not include active transportation elements of other projects),
- \$16.2 million (3.3%) for congestion management projects,
- \$9.3 million (1.9%) for studies, and
- \$0.4 million (0.1%) for other air quality projects.

Figure 1 illustrates these percentages:

Obligation Report

This report is organized by project sponsor. Information shown about each project includes:

- **Sponsor** lists the agency that is financially responsible for the project.
- **Project Name** provides a brief description of the project.
- **TIP ID (Transportation Improvement Program Identification)** is a unique number given to each project selected for inclusion in the Denver Regional Council of Governments' Transportation Improvement Program.
- **Funding Type** identifies the program that funds the project.
- **Obligation** is the sum of all the obligations that occurred for that project in this identified fiscal year only.
- **Active Transportation** indicates if active transportation infrastructure is part of the project.
- **Total Cost** lists the total project cost for the lifecycle of the project.
- **Federal Funds** lists the total amount of federal transportation funds awarded in the most recent Transportation Improvement Program that the project was active (may or may not be the currently adopted Transportation Improvement Program).
- **Federal Funds Remaining** lists the programmed federal transportation funds that are remaining for the project.

Local and state funds are included within the Total Cost column as part of the total overall project cost and are not broken out by project type. The federal funds in this report include the following funding type or Colorado Department of Transportation funding category:

- **On-System and Off-System Bridge** funds are for the replacement, rehabilitation, and widening of any public bridge, either on the state highway system or on locally maintained roadways.
- **Carbon Reduction Program** funds projects that reduce transportation-related carbon dioxide emissions.
- **Congestion Mitigation/Air Quality** can fund projects that reduce transportation-related emissions in non-attainment and maintenance areas for ozone, carbon monoxide, and small particulate matter.
- **Freight** funds improve the efficient movement of freight on the National Highway Freight Network.
- **High Priority Project** funds are allocated by Congress for projects of priority to particular Congressmembers.
- **National Highway Performance Program** funds improvements to the condition and performance of the National Highway System to help ensure progress toward achieving federal performance targets.
- **Safety** funds are typically used for projects that reduce the number and severity of crashes. It is a state program, but the funds depicted in this report are from federal sources only.
- **Section 5307** funds capital, maintenance, operations, and planning assistance for mass transportation in urbanized areas.
- **Section 5310** funds capital assistance grants to agencies, including private nonprofit organizations, to serve the transportation needs of older adults and people with disabilities.
- **Section 5311** funds capital and operating assistance grants for transit service in non-urbanized areas.

- **Section 5337**, or State of Good Repair, funds repairs and upgrades of rail transit systems and high-intensity bus transit systems that use high-occupancy vehicle lanes.
- **Surface Transportation Block Grant** is a flexible funding category typically used to fund roadway reconstruction, roadway operational improvements, roadway widening, new roadways, new interchanges, interchange reconstruction, active transportation improvements, and studies. Additional funds were provided to both the state and region to assist in recovery from the coronavirus pandemic.
- **Transportation Alternatives** primarily funds active transportation projects.

This report also contains deobligations, depicted as negative numbers. Deobligation occurs when the obligation is returned to the federal government. Deobligation occurs for several reasons, including:

- Bids came in lower than expected. After the project bid is accepted, the remaining obligated funds are returned and shown as a deobligation.
- Advanced construction projects (where the sponsor first pays the cost with non-federal funding and is reimbursed later) often result in a deobligation because first the project must be obligated to authorize work to begin and then deobligated when the sponsor agrees to pay the costs of the project. The project is then finally obligated again when it is time for the federal government to reimburse the sponsor.
- A project or project phase is closed out, deobligating any remaining funding. Project closeouts can sometimes take place many years after the project was completed.

This report also identifies which projects contain elements improving active transportation infrastructure. In some cases, this is an active transportation-only project (reflected in Figure 1). However, in most circumstances, the active transportation components are part of a larger project. Since deobligations are not current “investments,” their active transportation applicability is noted as “No”.

Descriptions of the projects that are contained in this report can be found within the [Transportation Improvement Program documents](#) or by using the searchable [online database of transportation projects](#) in the Denver region. This report is based on records obtained from the Colorado Department of Transportation and the Regional Transportation District, as the Denver Regional Council of Governments does not directly participate in the obligation process.
